Experience

United Nations Development Programme (UNDP) —Fellow Sep 2025 –May 2026 Bangkok, Thailand

- **Regional programme pipeline support:** Supported the development of partnership pipelines for GEF and GCF funded programmes across 5 Asia-Pacific countries; mapped seven institutional partners and built a partner database covering renewable energy and circular economy initiatives.
- **Multi stakeholder coordination:** Coordinated communication among regional teams and international partners including UNEP and FAO; supported the organization of 15 cross agency technical meetings.
- **Programme delivery tracking:** Built a regional tracking system for a TCCF plastics circular economy programme across 10 APAC countries, developing a 12-sheet monitoring framework aligning outputs, activities and indicators, enabling standardized country reporting and streamlined donor progress tracking.

OECD —Junior Consultant Mar 2025 –Sep 2025 Paris, France

- **Climate policy database & regulatory mapping:** Supported the OECD IFCMA Climate Policy Database by compiling and structuring China's climate mitigation policies; mapped 50+ policy instruments including carbon pricing, regulatory standards, and fiscal incentives, translating complex policy frameworks into structured datasets used for cross country policy comparison and regulatory analysis.
- **Policy intelligence for international investment context:** Prepared eight analytical briefings for OECD expert teams on China's dual carbon strategy and its implications for global low carbon investment and EU China industrial cooperation; contributed policy analysis to an internal report on corporate climate policy alignment between China and Europe.

ERM —Sustainability & Market Entry Consulting Intern Mar 2024 –Oct 2024 Paris, France

- **Outbound Compliance Advisory:** Supported compliance advisory for 5 renewable energy firms entering the EU market and analyzed regulatory frameworks (CSRD, CBAM), built regulatory applicability matrices and a RAG-based risk assessment model.
- **European Market Entry Research:** Conducted market entry analysis for Germany, France, and Spain, assessing industrial policy, subsidy schemes, and competitive landscape; mapped regulatory environments and value chains to support strategic expansion decisions for Chinese clean energy firms.
- **Industry Case & Risk Analysis:** Compiled case studies of 8 Chinese renewable energy companies expanding into Europe, analyzing regulatory, supply chain, and geopolitical risks; produced reference materials to support subsequent client engagements and cross border advisory projects. nsion risk playbook used as an internal client service reference tool.

Longing International Education —Co founder & Legal Representative 2022.02 –2025.04 China | Tianjin

- **0 to 1 compliance and operations build:** Built the firm's legal compliance system from scratch, developed SOPs and contract templates, covering education regulations across 10+ countries, ensuring end to end compliance with no major legal disputes.
- **Partnership and customer acquisition:** Led strategic collaboration with ITCILO, expanded channels across

five domestic universities, and scaled customer acquisition via community growth and campus outreach, growing the team from 2 to 18 and serving 100+ students per year.

- **Commercialization and delivery:** Designed tiered pricing (language training, single service, full application packages), optimized delivery processes, enabled 60+ successful overseas admissions, achieved 95% client satisfaction, and delivered annual revenue exceeding RMB 1.2 million.

World Federation of Engineering Organizations (WFEO) –Intern 2021.09 –2022.08 China | Tianjin

- Supported exhibition activities related to CIFTIS, managed external stakeholder communication and multilingual coordination, ensuring smooth delivery.

- Assessed climate resilience impacts of WFEO projects and contributed to annual report writing and technical analysis.

Skills & Languages

Languages: Chinese (native), English (C2, full professional proficiency for business communication, negotiation, and writing), French (B2, working proficiency for France and EU business contexts), Korean (A2, basic communication)

Technical Skills: Core business tools (Tableau, Excel (VBA)); data processing and analytics (Python, R, regression) supporting market analysis, BD decision making, and data visualization. Familiar with Stata and GIS for overseas market research and compliance data analysis.
